

2019 Beaverton Training Schedule and Information

Week Beginning:

- Feb 11 (free training week) – **TM8 Maintenance & Service Course**
- April 15 **TM8 Installation & Commissioning Course**
- June 17 **TM8 Maintenance & Service Course**
- Sept 23 **TM8 Installation & Commissioning Course**
- Oct 21 (free training week) – **TM8 Maintenance & Service Course**
- Dec 9 **TM8 Installation & Commissioning Course**

TM8 Installation & Commissioning Course – This course will focus on TM8/TM3 installation and commissioning and is intended primarily for transformer OEM's and those who wish to perform their own monitor installations. Students will completely install and commission a TM8 monitor, including stainless tubing bending and connection to transformer valves. **Class size limited to four (4) students.**

TM8 Maintenance & Service Course – This course will focus on TM8/TM3 maintenance, servicing and troubleshooting and is intended primarily for end-users (utility personnel) and those who will be responsible for maintenance and repair of the monitor. Students will completely dis-assemble / re-assemble a monitor and learn effective troubleshooting strategies, including troubleshooting exercises. **Class size limited to twelve (12) students.**

- **Training Cost:** \$2750 / person
- **Free Training Weeks:** 2 students maximum per group / utility
- Students are responsible for their own travel, lodging and transportation expenses. Lunch is provided each day.
- Students must be proficient in English, or will need to be accompanied by an interpreter.
- A laptop is highly recommended for each student for the training.

Note: Customers will only be certified to commission and service the TM8 monitor by attending and completing one of the above courses. For TM8, the **Commissioning Kit (PN 900-0068-01** – for TM8 commissioning certification only) must be purchased. These certifications are required

in order for Serveron to cover the warranty for any monitor commissioned or serviced by non-Serveron personnel or distributors. Certification is valid for a period of **three (3)** years from completion and must be renewed in order to retain certification.

Training Monitor Rental

We offer monitors to rent for either the TM8 Installation & Commissioning training or the TM8 Maintenance & Service training courses when this training is provided at a customer site (**US only**). The customer must supply or purchase from Serveron the helium and calibration gases and stainless-steel tubing and fittings (for the I&C training, where necessary).

Rental Cost: \$2500 per monitor / per week (includes shipping to the site and back to Serveron)
